1 DOCUMENTATION INCONSISTENCIES

Having reviewed the 23 supporting documents provided in the Planning Application No13/1749 – Land East of Hermitage Lane SS1b there were a number of anomalies or factual mistakes that should be corrected prior to submission.

Much of the supporting Documentation was found to be more akin to a sales brochure as opposed to a Planning Application.

The long and changing history of this project could explain some of the anomalies within the supporting documentation set. However as they form part of the application they should be accurate.
